

PRODUCT DATA

Chemlease® Mold Cleaner EZ

Description

Chemlease® Mold Cleaner EZ is a special blend of solvents designed to dissolve and remove wax from composite molds. Ideal for preparing composite mold surfaces for the application of sealers and release agents. Also excellent for cleaning brushes and equipment.

Application:

1. Chemlease® Mold Cleaner EZ should be applied to the mold surface with clean 100% cotton cloth (we recommend our Chemlease® Cotton Cloth). While the mold surface is still wet, vigorously wipe the mold dry with a second clean, dry 100% cotton cloth.
2. Frequently exchange saturated cloths with new, clean cloths.
3. Repeat process several times until all residue (dirt, dust, grease, moisture, etc.) is removed (at least two cleanings are recommended.)
4. The mold is then ready for application of sealers and/or release agents.

Note:

If you plan to use compounds or glazes etc. prior to applying sealer and/or release agent, be sure to wipe clean with Chemlease® Mold Cleaner EZ after doing so, as most buffing compounds will not allow sealers and release agents to work properly. Prolonged exposure on the mold surface (puddling, dipping, etc.) should be avoided.

Handling

For more information, request a copy of Chem-Trend's Material Safety Data Sheet. Do not use if the expiry date is exceeded.

Packaging

Chemlease® Mold Cleaner EZ is available in containers with 162 kg, 46 kg, 14 kg and 3,8 kg.
